

## Product Information

(May 2017)

### Information for wheel number 2920815 / 22.5 x 11.75

Dear customers,

Maxion's leading position in the global wheel world gives us the obligation to always proceed with new technical developments. We would like to introduce you the development that has been made on basis of the wheel 22.5x11.75 / 2920815 which will be replaced by part number 2920842 in short.

Due to design optimizations, the new reference number 2920842 will have a weight reduction of 0,5 kg. Please see hereunder the main wheel data:

**2920815 will be replaced with → 2920842**  
**Wheel weight 42,5 kg → will be reduced to 42.0 kg**

The wheel was successfully tested and homologated according to the fatigue life test requirements according to EUWA 3.11. We confirm that the wheel 2920842 is compatible to wheel 2920815, meaning, it can also be mounted to older commercial vehicles.

The wheel 2920815 will still be available until June 2017, after that we will discontinue to use this part number from production and shift to the wheel 2920842 completely.

Please forward this message further into your organization. For any questions we are at your disposal.

With best regards

Commercial Vehicle Wheel Sales
